The Autoflame Combustion Management System is designed to optimise combustion for industrial and commercial burner/boilers. Depending on the application, the ideal solution may involve any or all of the above components.

Complete Boiler/Burner Management System

The Autoflame Combustion Management System is designed to optimise combustion for industrial and commercial burner/boilers. Depending on the application, the ideal solution may involve any or all of the above components.

Last year our systems reduced fuel costs by £66,805,731

Last year our systems reduced emissions by 372,000 TONNES CO₂
Autoflame focuses exclusively on boiler/burner combustion management systems. As a result, our range of additional services have evolved around meeting the unique needs of this market:

**Innovation**
Autoflame has recently introduced the Mk8 EGA and the Mini Mk8 Controller. Our EGA, DTI and MM Controllers all have advanced touchscreen interfaces. Unlike competitors, our entire R&D budget is focused on Boiler Management Systems. By aligning with Autoflame, you are partnering with a company that will support you with the latest innovations in the boiler management industry.

**Flexibility**
After more than 40 years, we have earned our reputation for reliability and consistency across a broad spectrum of applications:
- We have long-standing partnerships with OEM’s including Faber Burner, Hurst Boiler, John Zink, Johnston Boiler, Limpsfield Engineering, Powerflame, St Johnson, Webster Engineering and Weishaupt.
- We have more than 60 service centres (we call them Technology Centres) worldwide.
- We have on three occasions won the British Queens Award For Enterprise.
- We are the worldwide Vendor of Choice for a Fortune 100 microchip manufacturer.

**Technical Support**
You are always just minutes away from talking on the phone to a trained engineer in our Biggin Hill, England, headquarters. We pride ourselves in responding to all technical emails within one business day, and usually within the same day.

**Systems Customisation**
Many of our innovations spring from meeting the unique requirements of our thousands of customers around the world. Come to us with unusual situations and we can often work out a solution together.
